ABOUT THE SESSION

CO-VALUE is a Horizon Europe project that has spent the past three years exploring how citizen engagement can strengthen knowledge valorisation - turning research and innovation into real value for society. Over this time, the project has run hands-on pilots with innovation projects and initiatives in Spain and Italy. Some examples include Solublion, a University of Alicante spin-off developing biodegradable, water-soluble alternatives to plastic; InferIA's work on making local heritage data accessible to citizens through AI; MOVERT's drone technology for urban air mobility; and REMEDY's remote patient-monitoring service in Emilia-Romagna. This networking session marks the project's final milestone in Brussels, bringing together representatives from cities, regions and innovation agencies for a first-hand look at what this kind of collaboration can achieve in practice - told directly by the CEOs and researchers who lived it.

PROGRAMME

TIME	SESSION
